

Table of Contents

Preface.....	iii
Acknowledgements	vii
Health, Safety and Environmental Precautions.....	xi
List of Tables.....	xxii
List of Figures	xxiii
List of Equations	xxiv
List of Abbreviations.....	xxvii
Chapter 1. Definition and Classification of Lipids	1
1.1. Hydrocarbons	2
1.1.1. Straight-chain (normal) saturated paraffins	3
1.1.2. Monobranched-chain paraffins	3
1.1.3. Multibranched paraffins: saturated isoprenoids (isopranes)	3
1.1.4. Normal, mono-unsaturated paraffins (monoenes/olefins).....	4
1.1.5. Normal, polyunsaturated hydrocarbons (polyenes)	5
1.1.6. Monobranched, unsaturated paraffins.....	5
1.1.7. Isoprenoid polyenes (isoprenes).....	5
1.1.8. Carotenoids	6
1.2. Alcohols	7
1.2.1. Normal, saturated alcohols.....	7
1.2.2. Monobranched-chain alcohols.....	7
1.2.3. Multibranched alcohols: saturated isopranols.....	7
1.2.4. Unsaturated alcohols	9
1.2.5. Isoprenoid alcohols (terpenols or polyprrenols)	9
1.2.6. Sterols	10
1.2.7. Vitamin alcohols.....	11
1.2.8. Long-chain polyols.....	13
1.3. Long-chain amino alcohols	13
1.4. Aldehydes.....	14
1.4.1. Normal, saturated aldehydes.....	14
1.4.2. Unsaturated aldehydes	15
1.4.3. Cyclopropane long-chain aldehydes	16
1.4.4. Isoprenoid aldehydes	16
1.5. Ketones and quinones.....	17
1.5.1. Methyl ketones.....	17
1.5.2. Symmetrical ketones.....	17
1.5.3. Unsaturated, branched, and/or cyclic ketones.....	17
1.5.4. Diketones	18
1.5.5. Quinones with isoprenoid side chains	18

1.6. Fatty acids	19
1.6.1. Straight chain (normal) saturated acids	19
1.6.2. Monomethyl branched saturated acids	19
1.6.3. Multibranching acids; saturated isoprenoid acids	21
1.6.4. Cyclopropane and cyclopropene fatty acids.....	22
1.6.5. Cyclopentene fatty acids.....	23
1.6.6. Straight chain, monoenoic acids.....	23
1.6.7. Polyenoic acids (PUFA)	23
1.6.7.1. Isoprenoid or terpenoid fatty acids	28
1.6.8. Acetylenic acids.....	28
1.6.9. Hydroxy acids	29
1.6.10. Keto acids	30
1.6.11. Dicarboxylic acids.....	30
1.6.12. Eicosanoids: prostaglandins, prostacyclin and thromboxanes (prostanoids).....	31
1.6.13. Epoxy and furanoid fatty acids	33
1.7. Waxes.....	33
1.7.1. Simple waxes (wax monoesters).....	33
1.7.2. Complex waxes (wax diesters).....	34
1.8. Acyl Esters of sterols and vitamin alcohols	34
1.8.1. Sterol esters	34
1.8.2. Vitamin alcohol esters.....	35
1.9. Acyl esters of polyhydric alcohols	36
1.9.1. Acyldiols (diol esters).....	36
1.9.1.1. Monoacyldiols (diol monoesters).....	36
1.9.1.2. Diacyldiols (diol diesters).....	37
1.9.2. Acylglycerols (glycerides)	37
1.9.2.1. Monoacylglycerols (monoglycerides).....	37
1.9.2.2. Diacylglycerols (diglycerides)	38
1.9.2.3. Triacylglycerols (triglycerides).....	38
1.10. Ethers of polyhydric alcohols	38
1.10.1. Diol ethers	38
1.10.1.1. Alkyl ethers of diols.....	39
1.10.1.2. Alk-1-enyl ethers of diols	39
1.10.1.3. Acylated alkyl ethers of diols	40
1.10.1.4. Acylated alk-1-enyl ethers of diols	40
1.10.2. Glycerol ethers.....	40
1.10.2.1. Alkyl ethers of glycerol.....	41
1.10.2.1.1. Monoalkyl ethers	41
1.10.2.1.2. Dialkyl ethers.....	41
1.10.2.1.3. Di- <i>O</i> -phytanylglycerol diether (archaeol).....	41
1.10.2.1.4. Trialkyl ethers.....	42
1.10.2.1.5. Dibiphytanyldiglycerol tetraether (caldarchaeol).....	42
1.10.2.2. Alk-1-enyl ethers of glycerol.....	45
1.10.2.2.1. Mono-alk-1-enyl ethers.....	45
1.10.2.2.2. Dialk-1-enyl ethers	45
1.10.2.3. Acylated alkyl ethers of glycerol.....	45

1.10.24. Acylated alk-1-enyl ethers of glycerol (neutral plasmalogens).....	46
1.11. Phospholipids	46
1.11.1. Glycerophospholipids (GP).....	46
1.11.1.1. Nitrogenous base-containing glycerophospholipids.....	46
1.11.1.2. Polyol-containing glycerophospholipids.....	47
1.11.1.2.1. Polyglycerolphospholipids	47
1.11.1.2.2. Glycerophosphoinositols.....	51
1.11.1.3. Variant forms of glycerophospholipids	52
1.11.2. Sphingophospholipids	54
1.11.3. Diol phospholipids.....	56
1.12. Glycolipids (saccharolipids).....	57
1.12.1. Glycosyl diacylglycerols (glycoglycerolipids).....	57
1.12.2. Glycosyl alkylacyl (or dialkyl) glycerols	59
1.12.3. Glycosyl-di- <i>O</i> -phytanylglycerols (glycosyl archaeols).....	59
1.12.4. Glycosyl dibiphytanyldiglycerol tetraethers (glycosyl caldarchaeols).....	61
1.12.5. Glycosides of hydroxy fatty acids	62
1.12.6. Acylated sugar derivatives.....	63
1.12.7. Glycophospholipids.....	64
1.12.8. Phosphoglycolipids in Gram-positive bacteria.....	65
1.12.9. Lipoteichoic acid or membrane teichoic acid	66
1.12.10. Glycerophosphoglycolipid derivatives of dibiphytanyldiglycerol tetraether	67
1.12.11. Phytoglycolipid (PGL).....	68
1.12.12. Lipopolysaccharides (in Gram-negative bacteria)	68
1.12.13. Steryl glycosides	69
1.12.14. Neutral glycosphingolipids (ceramide hexosides; cerebrosides)	69
1.12.15. Gangliosides.....	70
1.13. Sulfur-containing lipids	71
1.13.1. Long-chain diol sulfates and halogenated derivatives.....	71
1.13.2. Glycosphingolipid sulfates (cerebroside sulfates; sulfatides)	72
1.13.3. Glycoglycerolipid sulfates	72
1.13.4. Phosphosulfolipids	75
1.13.4.1. Phosphatidylglycerol sulfate (PGS).....	75
1.13.4.2. Archaeolphosphoryl-sulfotriglycosylarchaeol	75
1.13.5. Sulfated trehalose acyl esters.....	76
1.13.6. Sterol sulfates	76
1.13.7. Sulfonoglycosyl diacylglycerol (SQD).....	76
1.13.8. <i>N</i> -acyl-deoxyceramide sulfonic acid	77
1.13.9. Sulfonium analog of phosphatidylcholine	78
1.13.10. Sulfonium analog of PAF.....	78
1.14. Amino acid-containing lipids	78
1.14.1. <i>N</i> -Acyl amino acids and ester derivatives.....	78
1.14.2. <i>O</i> -Acyl carnitines.....	79
1.14.3. Homoserine-derived lipid	80
1.14.4. Peptidolipids	80

Chapter 2. Materials and Equipment.....	81
2.1. Solvents.....	81
2.2. Reference compounds.....	83
2.3. Glassware.....	84
2.3.1. Pipets and microsyringes.....	84
2.3.2. Tubes.....	86
2.3.3. Weighing flasks.....	86
2.4. Evaporators.....	87
2.4.1. Evaporation in a stream of nitrogen.....	87
2.4.2. Rotary evaporators.....	88
2.5. Stirrers and heaters.....	90
2.6. Analytical Instruments.....	90
2.6.1. Colorimeters.....	90
2.6.2. Visible-ultraviolet recording spectrophotometers.....	90
2.6.3. Spectrofluorimeters.....	91
2.6.4. Infrared recording (IR) and Fourier transform spectrometer (FTIR).....	91
2.6.5. Nuclear magnetic resonance (NMR) spectrometer.....	91
2.6.6. Mass spectrometer.....	91
2.6.7. Polarimeter.....	92
2.6.8. Spectropolarimeter.....	92
2.6.9. Gas-liquid chromatograph (GLC).....	92
2.6.10. High-performance liquid chromatograph (HPLC).....	93
2.6.11. Gel permeation chromatograph or size exclusion chromatograph.....	93
2.6.12. Matrix-assisted laser desorption/ionization (MALDI) source for MS.....	93
Chapter 3. Lipid Extraction Procedures.....	94
3.1. General precautions.....	94
3.2. General lipid extraction procedure.....	96
3.2.1. Extraction of animal tissues.....	97
3.2.2. Extraction of plant tissues.....	98
3.2.3. Extraction of microorganisms.....	99
3.2.4. Extraction of cell fractions, blood cells and plasma.....	101
3.2.5. Extraction of egg yolk.....	102
3.3. Storage of lipid extracts.....	102
3.4. Final purification and preparation of lipids for analysis.....	103
3.4.1. Removal of water-soluble contaminants.....	103
3.4.2. Preparation of free acid or salt forms of acidic lipids.....	103
Chapter 4. General Analytical Procedures.....	105
4.1. Dry weight.....	105
4.2. Phosphorus.....	106

4.2.1. Total-P (organically bound-P + free inorganic-P).....	106
4.2.1.1. Modified procedure of Allen	106
4.2.1.2. Modified micro-procedure of Bartlett	107
4.2.1.3. Modified micro-procedure of Duck-Chong; Zhou and Arthur.....	108
4.2.2. Phosphonate-P	109
4.3. Nitrogen.....	110
4.3.1. Total nitrogen (micro-Kjeldahl)	110
4.3.2. Total nitrogen (micro-procedure of Sloane-Stanley).....	111
4.3.3. Lipid amino nitrogen.....	111
4.4. Ester determination.....	112
4.5. Total sugars.....	113
4.6. Iodine value.....	114
4.7. Cholesterol.....	115
4.7.1. Total cholesterol.....	115
4.7.2. Free cholesterol (digitonin procedure)	115
4.7.3. Micro-procedure for free cholesterol	116
4.8. Total fatty acids and unsaponifiable material.....	117
4.8.1. Lipids containing only <i>O</i> -acyl esters.....	118
4.8.2. Lipids containing <i>O</i> -acyl esters and non-saponifiables.....	119
4.8.3. Lipids containing <i>O</i> -acyl esters, plasmalogens and non-saponifiables.....	120
4.9. Neutralization equivalent (titration of acidic lipids)	121
4.10. Plasmalogens.....	122
4.10.1. Long-chain aldehyde analysis.....	122
4.10.2. Vinyl ether determination.....	123
4.10.3. Vitamin A determination.....	124
4.11. N-Acyl containing lipids (sphingolipids). Fatty acid and long-chain base components	125
4.12. Water-soluble constituents	126
4.12.1. Choline determination.....	126
4.12.1.1. Choline reineckate procedure	126
4.12.1.2. Choline periodide micro-procedure	127
4.12.1.3. Modified periodide micro-procedure	128
4.12.2. Amino alcohols and amino acids	128
4.12.2.1. Total α -amino alcohols.....	129
4.12.2.2. Ethanolamine and serine as dinitrophenyl (DNP) derivatives.....	129
4.12.2.3. Amino acids, amino alcohols and amino sugars by amino acid autoanalyser	131
4.12.3. Glycerol analysis.....	132
4.12.3.1. In glycerophospholipids	132
4.12.3.2. In glycosyl diacylglycerols and acylglycerols	133
4.12.3.3. Alternative assay procedure for glycerol.....	135
4.12.4. Glycerophosphate analysis.....	135
4.12.4.1. Alkaline hydrolysis procedure	136
4.12.4.2. Total α + β -glycerophosphate analysis.....	138
4.12.4.3. α -Glycerophosphate analysis.....	139
4.12.4.4. β -Glycerophosphate analysis	139
4.12.4.5. <i>sn</i> -3-Glycerophosphate analysis.....	139

4.12.5. Diol and polyol analysis	140
4.12.6. Analysis of sugars in glycolipids	143
4.12.7. Inositol determination.....	144
4.12.7.1. GLC assay of inositol.....	146
4.13. Vicinal-glycol determination	146
4.13.1. Lipids with terminal glycol groups	146
4.13.2. Total vicinal hydroxyl groups.....	147
4.14. Glycerol ether or diol ether constituents	148
4.14.1. Acetolysis procedure.....	148
4.14.2. Enzymatic hydrolysis.....	149
4.14.3. Reductive hydrogenolysis.....	151
4.14.4. Acid hydrolysis procedures.....	152
4.14.4.1. For glycerol monoether or diol monoether derivatives	152
4.14.4.2. For glycerol diether derivatives	153
4.15. Sulfur.....	154
4.15.1. Total sulfur.....	154
4.15.2. Ester sulfate.....	155
4.15.3. Sulfatides	156
4.16. Spectrometric analyses	157
4.16.1. Ultraviolet-visible (UV-V) spectrometry	157
4.16.2. Infrared (IR) spectroscopy	159
4.16.3. Nuclear magnetic resonance (NMR) spectroscopy	164
4.16.4. Mass spectrometry (MS).....	165
4.16.4.1. Electron impact mass spectrometry (EI-MS)	168
4.16.4.2. Chemical ionization mass spectrometry (CI-MS)	169
4.16.4.3. Desorption ionization mass spectrometry (DI-MS).....	170
4.16.4.4. Electrospray ionization mass spectrometry	172
Chapter 5. Separation of Lipid Mixtures	174
5.1. Solvent fractionation.....	174
5.1.1. Acetone precipitation	174
5.1.2. Solvent partitioning (countercurrent distribution)	176
5.2. Column chromatography (liquid chromatography, LC)	177
5.2.1. Adsorption chromatography.....	178
5.2.1.1. General fractionation procedure on a silicic acid column	179
5.2.1.2. General fractionation procedure on acid-treated Florisil	181
5.2.1.3. Separation of neutral lipids on silicic acid, Florisil or acid-treated Florisil.....	183
5.2.1.4. Separation of phospholipids on alumina	184
5.2.2. Liquid-liquid partition chromatography.....	184
5.2.2.1. Sephadex partition column chromatography	185
5.2.2.2. Reversed phase partition chromatography of neutral lipids on factice.....	187
5.2.2.3. Reversed phase partition chromatography on lipophilic Sephadex	188
5.2.3. Ion-exchange chromatography	190

5.2.3.1. DEAE-cellulose column chromatography.....	190
5.2.3.2. TEAE-cellulose column chromatography	192
5.2.3.3. CM-cellulose column chromatography	194
5.2.4. High-performance liquid chromatography (HPLC).....	195
5.3. Thin-layer chromatography (TLC).....	200
5.3.1. Commercial TLC plates.....	200
5.3.2. Laboratory preparation of thin-layer plates	201
5.3.2.1. Microslide plates	201
5.3.2.2. Standard plates (analytical and preparative)	202
5.3.2.3. Silver nitrate impregnated plates (argentation TLC).....	203
5.3.2.4. Mineral oil- or silicone-impregnated plates (for reverse-phase TLC).....	203
5.3.2.5. Boric-acid-impregnated plates.....	204
5.3.3. Application of lipids to the plates.....	204
5.3.4. Chromatographic chambers and solvent systems	205
5.3.5. Detection and characterization of lipids on TLC.....	206
5.3.5.1. General detection reagents.....	207
5.3.5.2. Specific detection reagents.....	209
5.3.5.3. Recording of stained TLC plates	216
5.3.5.4. Autoradiography and radioisotope scanning.....	216
5.3.6. Quantitative analysis of lipids on TLC plates	216
5.3.6.1. Charring-transmission densitometry for total lipids.....	217
5.3.6.2. Quantitative analysis of acyl lipids by GLC analysis of their fatty acid components	218
5.3.6.3. Quantitative analysis of phospholipids and glycolipids by P and sugar estimation.....	219
5.3.7. Preparative TLC.....	220
5.4. Gas-liquid chromatography (GLC or GC).....	223
5.4.1. Preparation of column packings.....	223
5.4.2. Column preparation	224
5.4.2.1. Packed columns.....	224
5.4.2.2. Capillary (open-tubular) columns.....	225
5.4.3. Sample introduction	228
5.4.3.1. Preparation of sample	228
5.4.3.2. Sample injection.....	229
5.4.4. Fraction or peak collection.....	230
5.4.5. Qualitative analysis by GLC.....	233
5.4.5.1. Peak identification.....	233
5.4.5.2. Chain length and branching.....	233
5.4.5.3. Double bonds and cyclopropane rings	237
5.4.5.4. Various other functional groups.....	239
5.4.6. Quantitative analysis by GLC.....	241
5.4.6.1. Linearity of detector response.....	241
5.4.6.2. Measurement of peak area	242
5.5. Gel permeation chromatography (GPC)	244
5.5.1. Equipment, columns and solvents	245
5.5.2. Sample preparation and injection.....	245
5.6. Matrix assisted laser desorption /ionization (MALDI) mass spectrometry.....	247

Chapter 6. Radioisotopic Techniques in Lipidology	248
6.1. Radioactive precursors	248
6.1.1. Commercially available radioactive precursors	248
6.1.2. Synthesis of water-soluble radioactive precursors	251
6.1.2.1. [γ - ^{32}P]-Adenosine triphosphate	251
6.1.2.2. [^{32}P]- <i>rac</i> -3-Glycerophosphate	252
6.1.2.3. [$2\text{-}^3\text{H}$]- or [$1,3\text{-}^{14}\text{C}$]- <i>sn</i> -3-Glycerophosphate	253
6.1.2.4. [^{32}P]- <i>sn</i> -3-Glycerophosphate	254
6.1.2.5. Radio-labeled phosphorylcholines	255
6.1.2.6. Other water-soluble labeled lipid precursors	257
6.1.3. Preparation of radio-labeled lipid substrates	257
6.1.3.1. <i>sn</i> -1,2-[$\text{U-}^{14}\text{C}$]-Diacylglycerol	257
6.1.3.2. <i>sn</i> -3-[$\text{U-}^{14}\text{C}$]-Phosphatidic acid	258
6.1.3.3. Cytidine diphosphate- <i>sn</i> -1,2-[$\text{U-}^{14}\text{C}$]-diacylglycerol	259
6.1.3.4. Preparation of other radio-labeled lipid substrates	260
6.2. Radio-labelling of cellular lipid components	261
6.2.1. Microorganisms	261
6.2.1.1. <i>Escherichia coli</i>	262
6.2.1.2. Halophilic Archaea: <i>Halobacterium cutirubrum</i>	263
6.2.1.3. Algae: <i>Chlorella vulgaris</i>	264
6.2.1.4. Fresh-water diatoms: <i>Navicula pelliculosa</i>	265
6.2.1.5. Non-photosynthetic marine diatom: <i>Nitzschia alba</i>	267
6.2.1.6. Yeast cells: <i>Candida lipolytica</i>	268
6.2.2. Higher plants	270
6.2.2.1. Labelling of detached leaves	270
6.2.2.2. [^{32}P and ^{14}C]-Glycerophosphate-labelling of spinach leaf cell-free cell fractions ..	271
6.2.2.3. [^{32}P]- and [^{14}C]-Labelling of soybean phospholipids	272
6.2.2.4. [^{14}C]-Labelling of potato tuber phospholipids	273
6.2.3. Cell and tissue cultures	274
6.2.3.1. [^{14}C]-Labelling of soybean cell suspension cultures	274
6.2.3.2. [^{32}P]- or [^3H]-Labelling of lipids of mouse fibroblasts or Ehrlich ascites cells	275
6.2.3.3. [^{32}P]-Labelling of phospholipids in human tissue cultured cells	275
6.2.4. Animal tissues	276
6.2.4.1. Radio-labelling of rat liver lipids	276
6.2.4.2. Labelling of brain lipids	277
6.2.4.3. Labelling of mouse spermatozoa	278
6.3. Fractionation and isolation of radioisotopically labeled lipid components	279
6.3.1. Fractionation of [^{14}C]-labeled leaf lipids	279
6.3.1.1. Purification of [^{14}C]-labeled lecithin from leaves	280
6.3.1.2. Isolation of [^{14}C]-labeled mono- and digalactosyl diacylglycerols	281
6.3.1.3. Isolation of [^{14}C]-labeled phosphatidylglycerol	282
6.3.1.4. Other procedures for isolation of various labeled lipids from natural sources	282
6.4. Radioactivity measurement of labeled lipids	283
6.4.1. End-window or gas-flow counting	283
6.4.2. Scintillation counting	285

6.5. Autoradiography and scanning of chromatograms.....	286
6.5.1. Autoradiography.....	286
6.5.2. Scanning of radioactive chromatograms.....	288
6.5.3. Radio-gas detection.....	289

Chapter 7. Identification of Individual Lipids and Lipid Moieties ..291

7.1. Neutral lipids	291
7.1.1. Identification of neutral lipid classes	291
7.1.2. Hydrocarbons	292
7.1.2.1. Fractionation into chain types.....	292
7.1.2.2. Hydrocarbon chain-length identification by GLC or GC-MS.....	303
7.1.2.3. Double bond position and configuration in alkenes.....	304
7.1.2.4. Composition of hydrocarbons from various natural sources	307
7.1.3. Long-chain alcohols	308
7.1.3.1. Preparation of alcohol derivatives	308
7.1.3.2. Identification of alcohol chain length and chain type.....	311
7.1.4. Long-chain ketones and quinones	313
7.1.4.1. Analysis of methyl ketones by conversion to carboxylic acids (haloform reaction).....	314
7.1.4.2. Quinones (vitamin K and coenzyme Q)	314
7.1.5. Long-chain aldehydes	315
7.1.5.1. Preparation of aldehyde derivatives.....	315
7.1.5.2. Identification of aldehyde chain length and chain type.....	316
7.1.6. Fatty acids.....	317
7.1.6.1. Free fatty acids.....	317
7.1.6.1.1. Methylation by diazomethane.....	317
7.1.6.2. Identification of fatty acid chain length and chain type.....	319
7.1.6.3. Unsaturated esters: separation of individual esters.....	322
7.1.6.4. Unsaturated acids or esters: double-bond position and configuration	323
7.1.6.5. Fatty acid composition of natural oils and fats	328
7.1.7. Wax esters.....	328
7.1.8. Acylglycerols.....	330
7.1.8.1. Identification of mono-, di-, and triacylglycerol classes	330
7.1.8.2. TLC separation of acylglycerols on basis of degree of unsaturation	330
7.1.8.3. Separation of molecular species of acylglycerols by molecular weight or chain length	332
7.1.8.4. Stereospecific analysis of triacylglycerols	333
7.1.9. Neutral glycerol ethers	334
7.1.9.1. Identification of alkyl- and alk-1-enyl-acylglycerol ether classes	334
7.1.9.2. Preparation of <i>O</i> -alkyl and <i>O</i> -alk-1-enyl-glycerols from the corresponding acylated lipids	335
7.1.9.3. Identification of alkyl group chain length	336
7.2. Complex polar lipids.....	338
7.2.1. Glycerophospholipids	338
7.2.1.1. Preliminary identification of polar complex lipids from various sources by TLC	338
7.2.1.2. Separation, analysis and identification of variant forms of glycerophospholipids	348
7.2.1.3. Spectral characterization of complex polar lipids	355
7.2.1.4. Characterization of phospholipids by chemical analysis.....	363

7.2.1.5. Mild alkaline deacylation of phospholipids and glycolipids.....	366
7.2.1.6. Enzymatic hydrolysis of glycerophospholipids.....	373
7.2.1.7. Drastic hydrolysis of glycerophospholipids and glycolipids	379
7.2.1.8. Identification of molecular species of glycerophospholipids	380
7.2.2. Sphingosyl phospholipids.....	381
7.2.2.1. Isolation of sphingomyelin and cerebrosides by alkaline methanolysis procedure	382
7.2.2.2. Chemical analysis of sphingosyl phospholipids.....	382
7.2.2.3. Degradative procedures for sphingolipids	383
7.2.2.4. Analysis of long-chain bases.....	384
7.2.2.5. Analysis of ceramides	387
7.3. Glycolipids	389
7.3.1. Glycosyl diacylglycerols	389
7.3.2. Glycosphingolipids (cerebrosides, ceramide polyhexosides and gangliosides)	392
7.3.3. Phosphoglycolipids and glycolipid sulfates	393
References.....	394
Subject Index.....	412
