List of Equations

Eq. 4.1 Calculation of lipid concentration in stock solutions 105
Eq. 4.2 Calculation of total-P 107
Eq. 4.3 Perchloric acid digestion of phosphonates 109
Eq. 4.4 Calculation of phosphonate-P 110
Eq. 4.5 Calculation of total nitrogen (micro-Kjeldahl) 110
Eq. 4.6 Calculation of total nitrogen (Sloane-Stanley micro-procedure) 111
Eq. 4.7 Calculation of lipid amino nitrogen 112
Eq. 4.8 Reaction for ester determination 112
Eq. 4.9 Calculation of μmoles ester groups 113
Eq. 4.10 Calculation of total sugar 114
Eq. 4.11 Calculation of iodine value 114
Eq. 4.12 Calculation of total cholesterol 115
Eq. 4.13 Calculation of free cholesterol and cholestrol esters 116
Eq. 4.14 Oxidization of cholesterol 116
Eq. 4.15 Calculation of free cholesterol in micro-procedure 117
Eq. 4.16 Conversion of acyl esters and fatty acids to fatty acid methyl esters 118
Eq. 4.17 Calculation of % fatty acid methyl esters 119
Eq. 4.18 Calculation of % free fatty acids 120
Eq. 4.19 Calculation of % fatty acids and non-sponifiables 121
Eq. 4.20 Titration of acidic lipids 121
Eq. 4.21 Calculation of fatty acid / acidic lipid and neutralization equivalents 122
Eq. 4.22 Reaction of long-chain aldehydes with p-nitrophenyl hydrazine 122
Eq. 4.23 Calculation of μmoles aldehyde 123
Eq. 4.24 Reaction of vinyl ether with iodine 123
Eq. 4.25 Calculation of μmoles vinyl ether 124
Eq. 4.26 Calculation of vitamin A 125
Eq. 4.27 Strong acid hydrolysis of N-acyl containing lipids (sphingolipids) 125
Eq. 4.28 Choline reineckate formation 126
Eq. 4.29 Calculation of mg choline 127
Eq. 4.30 Choline periodide formation 127
Eq. 4.31 Calculation of μgrams choline 128
Eq. 4.32 Calculation of μgrams choline in modified periodide micro-procedure 128
Eq. 4.33 Reaction of α-amino alcohol with periodate 129
Eq. 4.34 Calculation of μmoles α-Amino alcohol 129
Eq. 4.35 Ethanolamine and serine reaction with dinitrofluorobenzine 130
Eq. 4.36 Calculation of μmoles ethanolamine 131
Eq. 4.37 Calculation of μmoles serine 131
Eq. 4.38 Calculation of μmoles amino compound by amino acid analyser 132
Eq. 4.39 Strong hydrolysis of glycerophospholipids for assessment of glycerol 132
Eq. 4.40 Calculation of μmoles glycerol 133
Eq. 4.41 Glycosyl diacylglycerol and acylglycerol hydrolysis for assessment of glycerol 133
Eq. 4.42 Alternative assay for glycerol 135
Eq. 4.43 Glycerophosphate release by alkaline hydrolysis of phospholipids and glycolipids 136
Eq. 4.44 Phosphate release from glycerophosphates by acid hydrolysis and periodate reaction 138
Eq. 4.45 Calculation of ($\alpha + \beta$) glycerophosphate-P 138
Eq. 4.46 Calculation of α-glycerophosphate-P 139
Eq. 4.47 Calculation of β-glycerophosphate-P 139
Eq. 4.48 Enzymatic oxidization of *sn*-3-glycerophosphate with GP-dehydrogenase 140

Eq. 4.49 Calculation of the *sn*-3-glycerophosphate ... 140
Eq. 4.50 Release of diols by methanolysis of lipid diol analogues ... 141
Eq. 4.51 Releae of sugars in glycolipids by acid methanolysis ... 143
Eq. 4.52 Action of periodate on lipids having terminal glycol groups ... 146
Eq. 4.53 Calculation of μmoles terminal vicinal glycol ... 147
Eq. 4.54 Calculation of total vicinal glycol ... 148
Eq. 4.55 Acetolysis of phosphodiester groups in mono-*O*-alkyl ether analogs ... 148
Eq. 4.56 Calculation of % glycerol ethers and/or diol ethers following acetolysis ... 149
Eq. 4.57 Phospholipase C hydrolysis of lipids containing alk-1-enyl or alkoxy groups ... 150
Eq. 4.58 Release of alkyl and alk-1-enyl glycerols by reductive hydrogenolysis ... 151
Eq. 4.59 Calculation of % glycerol ethers and / or diol ethers following acid hydrolysis ... 153
Eq. 4.60 Acid hydrolysis of glycerol diether derivatives ... 153
Eq. 4.61 Calculation of μgrams total sulfur ... 155
Eq. 4.62 Hydrolysis of sulfate ester by mild acid-catalyzed solvolysis ... 155
Eq. 4.63 Calculation of μgrams ester S ... 156
Eq. 4.64 Calculation of μmoles sulfatide ... 157
Eq. 4.65 Definition of "chemical shift" ... 164

Eq. 5.1 Periodate-Schiff stain of vicinal-OH groups ... 211
Eq. 5.2 Calculation of μgrams fatty acids and μmoles acyl lipids ... 219
Eq. 5.3 Calculation of GLC CH_2 separation factor for long-chain lipids ... 234
Eq. 5.4 Calculation of GLC $2CH_2$ separation factor for long-chain lipids ... 234
Eq. 5.5 Calculation of GLC xCH_2 separation factor for long-chain lipids ... 234
Eq. 5.6 Calculation of CH_2 separation factor from relative retention time ... 235
Eq. 5.7 Logarithmic form of Eq. 5.6 ... 235
Eq. 5.8 Calculation of carbon number and ECL ... 235
Eq. 5.9 Calcuation of area of Gaussian distribution peaks on GLC ... 242
Eq. 5.10 Calculation of area as proportional to peak height x width ... 242
Eq. 5.11 Calculation of relative area of GLC component peak ... 243
Eq. 5.12 Area as a function of retention time x peak height ... 243
Eq. 5.13 Relative % area of GLC peak component as function of retention time ... 244
Eq. 5.14 GLC peak area approximation by triangulation ... 244

Eq. 6.1 Reaction for synthesis of ^{32}P-*rac*-3-glycerophosphate ... 252
Eq. 6.2 Reaction for synthesis of [2-^{3}H]- or [1,3-^{14}C]- *sn*-3-glycerophosphate ... 253
Eq. 6.3 Reaction for synthesis of [^{32}P]-*sn*-3-glycerophosphate ... 254
Eq. 6.4 Reaction for synthesis of [^{32}P]-phosporylcholine ... 255
Eq. 6.5 Reaction for synthesis of *sn*-1,2-[U-^{14}C]-diacylglycerol ... 257
Eq. 6.6 Reaction for synthesis of *sn*-3-[U-^{14}C]-phosphatidic acid ... 258
Eq. 6.7 Reaction for synthesis of cytidine diphosphate-*sn*-1,2-[U-^{14}C]-diacylglycerol ... 259
Eq. 6.8 Correction for decay of ^{32}P and ^{35}S ... 284
Eq. 6.9 Calculation of counting efficiency ... 286
Eq. 6.10 Calculation of exposure time to X-ray film ... 288

Eq. 7.1 Periodate-permanganate oxidation of double bonds ... 304
Eq. 7.2 Ozonolysis-pyrolysis reaction of double bonds ... 305
Eq. 7.3 Formation of *O*-isopropylidene diol from alkenes ... 306
Eq. 7.4 Reaction for synthesis of alcohol acetates ... 308
Eq. 7.5 Reaction for synthesis of methoxy derivatives ... 309
Eq. 7.6 Reaction for synthesis of TMS-ether derivatives ... 309
Eq. 7.7 Reaction for conversion of alcohols to fatty acid methyl esters ... 310

Eq. 7.8 Haloform reaction of methyl ketones....314
Eq. 7.9 Reaction for conversion of aldehydes to dimethyl acetals....315
Eq. 7.10 Reaction for conversion of aldehydes to alcohols and alcohol acetates....315
Eq. 7.11 Reaction for conversion of aldehydes to fatty acid methyl esters....316
Eq. 7.12 Reaction of fatty acids with diazomethane....317
Eq. 7.13 Calculation of % free fatty acids....318
Eq. 7.14 Calculation of weight of free fatty acids (mg)....318
Eq. 7.15 Oxidation products of branch-chain fatty acids....320
Eq. 7.16 Products of hydrogenation of cylcopropane fatty acids....321
Eq. 7.17 Products of periodate-$KMnO_4$ oxidation of monoenoic fatty acids....323
Eq. 7.18 Products of reductive ozonolysis of monenoic fatty acids....324
Eq. 7.19 Products of oxidative ozonolysis of unsaturated fatty acids....325
Eq. 7.20 Synthesis of *O*-isopropylidene diol from unsaturated fatty acids....326
Eq. 7.21 Products of reaction of epoxy-fatty acids with dimethylamine....327
Eq. 7.22 Calculation of average fatty acid molecular weight....364
Eq. 7.23 Calculation of average number of double bonds per molecule....366
Eq. 7.24 Analysis of long-chain bases via derived aldehydes....385
