

## List of Tables

Table 1.1.	Some normal and branched-chain hydrocarbons.....	4
Table 1.2.	Some normal and branched-chain primary alcohols.....	8
Table 1.3.	Some normal monoenoic alcohols and aldehydes.....	9
Table 1.4.	Some members of the prenologue series.....	10
Table 1.5.	Some normal saturated aldehydes and ketones.....	15
Table 1.6.	Some normal and branched chain fatty acids.....	20
Table 1.7.	Some monoenoic fatty acids.....	24
Table 1.8.	Some polyunsaturated fatty acids.....	26
Table 1.9.	Some dicarboxylic acids.....	31
Table 1.10.	Nitrogenous base-containing <i>sn</i> -3-glycerophospholipids.....	47
Table 1.11.	Variations in structures of glycerophospholipids.....	53
Table 1.12.	Some bacterial <i>sn</i> -3- <i>O</i> -glycosyl diacylglycerols.....	58
Table 2.1.	Some commercial sources of reference lipid standards.....	85
Table 4.1.	Ultraviolet absorption maxima for some chromophoric groups.....	158
Table 4.2.	Major infrared absorption bands in spectra of various lipids.....	160
Table 4.3.	Proton and <sup>13</sup> C resonance signals for various structured groups.....	166
Table 5.1.	Column chromatography of neutral lipids on various adsorbents.....	185
Table 5.2.	Ion-exchange chromatography of lipids on DEAE-cellulose.....	193
Table 5.3.	Stationary phases and supports commonly used in GLC.....	226
Table 5.4.	Carbon-chain separation factors in GLC.....	236
Table 5.5.	Functional group separation factors in GLC.....	240
Table 6.1.	Radioisotope-labeled precursors for metabolic labelling of lipids.....	249
Table 7.1.	<i>R<sub>f</sub></i> values of neutral lipid classes in various solvent systems.....	294
Table 7.2.	Staining behaviour of neutral lipid classes on TLC.....	296
Table 7.3.	Infrared absorption of neutral lipid classes.....	297
Table 7.4.	Retention times of common fatty acid methyl esters.....	312
Table 7.5.	<i>R<sub>f</sub></i> values and staining behaviour of polar lipids on TLC in various solvents.....	339
Table 7.6.	Overall quantitative lipid composition of photosynthetic tissues.....	342
Table 7.7.	Phospholipid composition of photosynthetic tissue.....	343
Table 7.8.	Polar lipids of known genera of extremely halophilic Archaea.....	351
Table 7.9.	Phospholipid <sup>31</sup> P NMR chemical shifts in the hydrated reagent.....	361
Table 7.10.	[M-H] <sup>+</sup> molecular ions of halophilic archaeol phospholipids and glycolipids.....	364
Table 7.11.	Analytical data for phospholipids and glycolipids.....	365
Table 7.12.	Mobilities of water-soluble products of deacylation or hydrolysis.....	368
Table 7.13.	Products of enzymatic hydrolysis of common glycerophospholipids.....	374
